WHY TRITAN™ RENEW

Glasslike presentation without the fragility Tritan™ Renew from Eastmans gives Aura the crystal-clear appearance and delicate feel associated with glass, combined with the resilience needed for busy commercial service.

tritan™ RENEW from Eastman

It is resistant to chipping, cracking and breakage and is designed to retain its clarity through repeated commercial dishwasher cycles. This means fewer replacements, less interruption during service and greater confidence in high-traffic environments.

Crystal-clear clarity

Resistant to chipping, cracking, and breakage, and engineered for high-traffic service environments.

Shatter resistant

Designed for environments where traditional glassware can create additional risk, waste and replacement costs.

Made for repeated commercial use

Maintains performance and clarity through hundreds of commercial wash cycles.

BPA, BPS and BPF free

Food-safe drinkware designed to preserve taste integrity

Sustainable to it’s core

Single-use plastic is broken down and rebuilt into food-safe material for repeated use. The equivalent of one recycled single-use plastic bottle is used to produce one Aura glass

AURA DRINKWARE

DESIGNED IN UK

WHY MELAMINE

DURABLE BY DESIGN
Melamine combines the polished appearance of premium tableware with the strength required for high-volume hot drinks service.

Lightweight and highly resistant to chips to breakages, it supports safer handling and reduces the need for frequent replacements. It is an ideal material for cafés, breakfastservice, contract catering and other environments where drinkware is constantly being carried, stacked and washed.

x4 STRONGER

Highly resistant to breakage

Dalebrook melamine is proven to be 4 times stronger than its ceramic counter parts.

Lighter for easier handling

Reduced carrying weight supports quicker service and more comfortable tray handling.

Built for repeated use

Designed to maintain its appearance and performance through regular commercial service.

Safe for professional drinks service.

BPA, BPS and bisphenol-free. Meets EU, UK, US and Middle Eastern food contact standards.
