POOLSIDE DINING

WWW.DALEBROOK.COM

DALEBROOK'S POOLSIDE DINING COLLECTION

Poolside and beachside dining can be every bit as beautiful as fine indoor service. With Dalebrook's premium melamine collections, there is no compromise. Each design captures the look and feel of ceramic while resisting chips and breakages, ideal for carefree outdoor dining. Guests enjoy the same sense of luxury and refinement, while operators gain the confidence of durable, practical tableware that thrives in outdoor environments.

DESIGNED FOR POOLSIDE

In hospitality environments, safety and service efficiency go hand in hand. Poolside areas present one of the highest risk zones due to wet surfaces and barefoot guests. Replacing glass and ceramic with Tritan™ Renew drinkware and melamine serveware significantly reduces breakage while maintaining a premium presentation.

WHY TRITAN™ RENEW

tritan™ RENEW from Eastman

Poolside service demands resilience without compromise. Tritan™ Renew from Eastmans delivers the clarity and feel of glass with commercial-grade durability, making it a practical alternative where safety, volume, and sustainability are critical.

Diverting plastic waste from Landfills*

Single use plastics are broken down and rebuilt into pristine, food-safe materials designed for repeated commercial use.

1 single-use plastic bottle is recycled to produce just one Aura glass.

Crystal-clear clarity with exceptional durability.

Resistant to chipping, cracking, and breakage, and engineered for high-traffic service environments.

Free of Toxins & Harmful Chemicals

Free from BPA, BPS & BPF. Tritan™ Renew from Eastmans resists chemical leaching and maintains clarity, taste integrity, and performance across thousands of commercial wash cycles.

Longer service life means fewer replacements.

Reduced waste, and lower operational disruption across hospitality settings.

WHY MELAMINE

In fast-paced hospitality environments, melamine delivers strength, safety, and consistency. Designed for repeated use, it supports confident service in high-volume, high-risk areas without compromising presentation.

x4 STRONGER

Highly resistant to breakage, chipping, and cracking.

Dalebrook melamine is proven to be **4 times stronger than ceramics.**

Lighter by design for safer handling.

Melamine reduces carrying weight compared to ceramic alternatives, supporting faster service and reduced strain in high-volume environments.

Built for repeated, intensive use.

Designed to maintain performance and appearance through long service cycles without the fragility of ceramic or stoneware.

Safe for professional food service.

BPA, BPS, and bisphenol-free. Meets EU, UK, US, and Middle East food-contact standards.

TALON DRINKWARE

A distinctive corrugated profile keeps hands cool while serving hot beverages, combining function with striking design.

TALON

Talon stands out with a dual-colour design that energises the table and draws the eye. Created for high-volume environments, it offers both impact and efficiency. Plates can sit neatly on their matching bowls to create covered service that keeps food secure while it is carried or stored. Talon's vivid style and practical build make it a natural choice for poolside and casual dining spaces that want to make an impression.

HOXTON

Hoxton combines smooth matte surfaces with architectural straight walls to create a strikingly modern collection. Each plate is made to sit securely on its matching bowl, forming a lid that allows dishes to be stacked, carried and presented with ease. This practical design keeps food protected while retaining a sleek, contemporary style.

PIGMENT

Pigment celebrates the artistry of hand-thrown ceramics through sculptural shapes and organic textures. The collection's flowing lines and tactile finishes create a natural canvas for creative presentation, complementing menus that lean into fresh, seasonal ingredients. Pigment transforms simple plating into something expressive, elevating dishes with the quiet luxury of crafted design.

MINERAL

Mineral captures the depth and luminosity of stoneware ceramics. The matte surface is scattered with glossy particles that catch and reflect the light, giving food an added sense of vibrancy. Each piece brings a crafted look to the table while offering the resilience and practicality of premium food-grade materials, making it as reliable as it is beautiful.
